Blue Ember Grills: Retrofit Blue Ember grills without a heat shield with a new grease pan / heat shield.

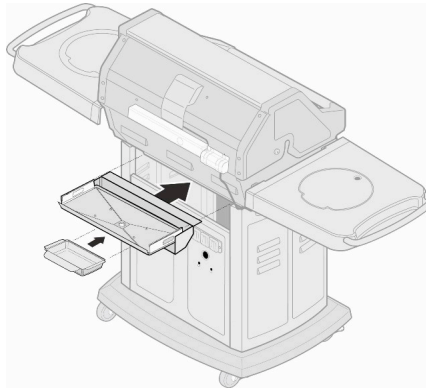

Problem:

In Blue Ember grills without heat shields, if the propane tank or natural gas hose is improperly installed, the propane hose or natural gas hose can be exposed to excessive heat, posing a risk of fire hazard. Owners of affected Blue Ember grills should replace the original grease pan with a new grease pan/heat shield, available free of charge from Fiesta Gas Grills, LLC. The replacement grease pan is designed to also act as a heat shield to protect the hose from being exposed to excessive heat from the firebox.

Owners of affected Blue Ember grills should install the new grease pan / heat shield before using the grill again.

Only the following Models and Serial Numbers are affected. The Model and Serial Numbers are printed on a rating plate label (a rectangular metal plate) on the rear of the grill. Only those grills that have both a listed model number and also a listed serial number are affected.
